<https://doi.org/10.1186/s40069-025-00801-4>

The Editor-in-Chief has retracted this article. After publication, a number of image integrity concerns were found:

- In Fig. 3, the image of *Fragilaria* sp. is cropped from a website called “Culture Collection of algae and proto-

zoa” [1] rather than an original image by the authors as described.

- Fig. 9 *Synechocystis* (sp.pcc6803) internal seawater treatment and Fig. 10 *Fragilaria* (sp. CCAP1029) appear to overlap
- Within Fig. 11, location 1 *Synechocystis* (sp.pcc6803) appears to overlap with both location 1 *Fragilaria* (sp. CCAP1029) and location 2 *Fragilaria* (sp. CCAP1029)
- Four panels overlap within Figs. 11 and 12, control panels for locations 1 and 2
- The control EDX spectra appear to overlap in Figs. 13 and 14

Due to the extensiveness of the concerns raised, the Editor has lost confidence in the data and conclusions of this article.

Khaled N. M. Elsayed has stated on behalf of all authors that all authors disagree with this retraction.
