Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-024-57626-6>, published online 27 March 2024

The original version of this Article contained a repeated error in the area size stated in square kilometres.

As a result, in the Abstract,

“This phenomenon persists for 4 to 6 months of the year over an area of 278,40 km² (~30% of SCB area).”

now reads:

“This phenomenon persists for 4 to 6 months of the year over an area of 27,840 km² (~30% of SCB area).”

In addition, in the Results, under the subheading ‘Effects of land-based nutrient inputs on phytoplankton biomass, oxygen, and pH’,

“The area impacted by these biogeochemical changes is approximately 278,40 km² in size.”

now reads:

“The area impacted by these biogeochemical changes is approximately 27,840 km² in size.”

The original Article has been corrected.
